SIMONELLI

您可以信賴的咖啡機

新一代 **AURELIA WAVE**。 五大特點完美呈現。

智慧沖煮新浪潮：新一代的 Aurelia Wave 賦予咖啡機全新意象：Aurelia Wave 咖啡機流水般優美的側面曲線。但這只是開端，因我們所採用的嶄新技術將讓您大感驚豔。Nuova Simonelli 鎖定5大重點，將咖啡機的技术標準提升至全新層次：

- 1 水質
- 2 生態永續
- 3 高品質濃縮咖啡
- 4 數位資訊
- 5 人體工學設計

NEW **AURELIA WAVE**. FIVEFOLD PERFECTION.

Wave: The identity of the new Aurelia. Wave like water, wave as the distinctive line of the side. But this is just the beginning. Because its technology will astonish you, and not only once, but five times. Because there are five themes on which Nuova Simonelli has put its attention, once again rising the bar of coffee machine technology:

- 1 Water.
- 2 Eco-sustainability.
- 3 Quality of the espresso.
- 4 Digital information.
- 5 Ergonomics.

1

SMART WATER TECHNOLOGY.
智慧水質監測科技

我們並非檢查熱水的狀態，而是實際進行分析。

水質是優質咖啡的關鍵要素，對於飲品的品質和機器的可靠性都具有重大影響。Aurelia Wave 採用智慧水質科技，得以監測基本的水質參數，並在水質有所變化時發出警告。雖然水質是影響品質可靠性 50-70% 的成因，但卻從未有任何咖啡機具備此功能。透過此方式，咖啡師可以確保水質，並可節省機器的維護成本。

Aurelia Wave 所掀起的浪潮，是一場純粹而簡單的革命，對您的好處不言而喻。

AURELIA WAVE

- 保護咖啡機，讓機台壽命更長久。
- 降低濾芯的維護和採購成本。
- 保證一致的咖啡品質。

WE HAVE NOT DISCOVERED HOT WATER. WE HAVE ANALYZED IT.

Water is a key element for coffee and has a great impact on both beverage quality and machine reliability. Thanks to Smart Water Technology, Aurelia Wave detects basic water parameters and warns when quality changes. This may seem only logical, but no coffee machine had ever done it before, despite the water being responsible for 50-70% of reliability issues. This way, the barista can be certain of water quality and can save in machine maintenance.

The wave of Aurelia Wave is a pure and simple revolution and the benefits to you are clear and transparent.

AURELIA WAVE

- Protects your machine providing it a longer life.
- Lowers maintenance and purchase costs of filter cartridges.
- Guarantees the constant quality of coffee.

2

3

PULSE-JET TECHNOLOGY
間歇萃取技術

萃取技術是我們的執著所在。

還記得我們令人驚艷的SIS 漸壓式預浸系統嗎？如今，Nuova Simonelli 憑藉採用間歇萃取（*Pulse-Jet*）技術的 Aurelia Wave，達到了萃取科學的新里程碑，間歇萃取是一種新的專利技術，可優化沖煮階段的流量和水壓。您將探索以前從未嘗試過的萃取因素組合：各種層次的香氣和細微差異，無論是嗅覺或味覺都將令您驚嘆，您將滿意地品味以前未曾嚐過的咖啡。

如果我們的技術無法提升您的專業，並為您顧客的日常生活帶來幸福的感受，那麼技術對我們而言就毫無意義。

AURELIA WAVE

- 探索新的咖啡萃取因素組合，提升咖啡的風味。
- 讓顧客享用更卓越的咖啡。
- 賦予咖啡客製化的獨特風味。

EXTRACTION IS OUR OBSESSION.

Remember our glorious SIS system? With Aurelia Wave, today Nuova Simonelli reaches a new milestone in the extraction science with *Pulse-Jet*, the new patented technology that optimizes the flowrate and water pressure during the dispensing phase. The result? You can explore extraction profiles that were never tried before: a spectrum of aromas, nuances, nose and palate sensations that will amaze you and will bring a smile of satisfaction when you will try a coffee you've never tasted before.

Because technology is nothing to us, if it is not useful to improve your profession and the daily happiness of your customers.

AURELIA WAVE

- It allows you to discover new extraction profiles to enhance your coffee.
- It improves the quality of coffee that you offer to your customers.
- Allows you to personalize your coffee.

4

ERGONOMICS & EFFICIENCY.
人體工學與效率。

最重要的始終是操作咖啡機的人。

世界上第一台取得人體工學認證的咖啡機是 Aurelia。透過 Aurelia II，我們達到了人體工學的新標準，今日，我們可以說，新的 Aurelia Wave 是迄今為止最符合人體工學的咖啡機。歡迎試試看、探索它如何讓您輕鬆完成工作。有了全新的專利自動短清（Auto- - purge）系統，當取下濾器把手時，噴頭就會自動進行清潔。

輔助照明燈如今只在使用蒸汽棒時才會啟動，確保功能性和節能。我們還重新設計了沖煮鍵的位置，以便您可以同一隻手的拇指直接按下按鍵，同時握住沖煮把手。畢竟，如果科技無法改善人類生活又有何用？

AURELIA WAVE

- 簡化和減少日常操作程序，讓咖啡師工作更有效率。
- 提高生產力和服務速度。
- 改善噴頭的清潔和衛生，提供優質的服務。

THE MOST IMPORTANT PART OF A MACHINE IS THE PERSON BEHIND IT.

In the beginning there was Aurelia, the first machine in the world with an ergonomic certification. With Aurelia II we have reached new standards in ergonomics and today we can say that the new Aurelia Wave is the most ergonomic machine ever. Try it, and find out how easy it can make your job. With its new patented *Auto-purge* system, the cleansing of the sprayheads happens automatically when unplugging the filter holder.

The *Milk-light* now only activates when using the wands, ensuring functionality and energy savings. We have also repositioned the dispensing buttons in order to allow you to press the buttons directly with the thumb of the same hand used to engage the filter holder. After all, what is the purpose of technology if not improving human life?

AURELIA WAVE

- **Simplifies and reduces routine operations, protecting the well-being of the barista.**
- **Increases productivity and speed of service.**
- **Improves the cleanliness and hygiene of the sprayheads for excellent service.**

TECHNICAL DETAILS 技術細節

預設模式。只需透過指尖操作，即可掌握更豐富的選單。

有了 Aurelia Wave，讓咖啡萃取變得無比簡單：多種預設模式讓咖啡師只需輕按一下即可更改萃取設定。預設模式根據主要參數（例如蒸氣鍋爐、沖煮鍋爐與沖煮頭的水量和溫度）進行調整，輕鬆的改變咖啡風味，萃取一杯好的咖啡。一切都可透過4.3 英吋的觸控螢幕完成。每項操作都像使用智慧型手機一樣簡單和直覺化，成就顧客的滿意度。

PRE-SET SCENARIOS. AN INCREASINGLY RICH MENU WITH A TOUCH.

With Aurelia Wave, even programming is simple and straightforward: various pre-set scenarios allow the barista to change the extraction settings with a single click. Pre-set scenarios act on the main parameters (such as volumes and temperature of the boiler, group boiler and group) to adapt to the various types of coffee. Everything is done using the 4.3" touch screen. Every operation is as simple and intuitive as with your smartphone, and the result is the satisfaction of your customers.

溫控熱水系統。

有了 Aurelia Wave，您可以選擇三種不同溫度的熱水和三種不同的預設水量，以自訂水溫，使其達到理想的溫度，每位顧客都將享受到最適切的水量。直接從螢幕操作，讓準備無比容易。

HOT WATER WITH A TEMPERATURE CONTROL SYSTEM.

With Aurelia Wave you can choose hot water at three different temperatures and with three different preset volumes to customize your infusion menu. Each tea variety will have its ideal temperature and each customer will enjoy the preferred amount of water. Preparation is easy, directly from the display.

EASYCREAM 系統讓打奶泡超輕鬆。

Aurelia Wave 亦採用 Easycream 系統，讓咖啡師得以快速自動獲得濃稠綿密的奶泡。這種極其靈活的技術讓咖啡師可以設定牛奶的溫度和發泡率。只需按下按鈕，Easycream 蒸汽棒即開始運轉：在第一階段是平衡蒸汽和注入空氣，然後中斷氣流，只散發出蒸汽，在蒸汽棒的末端具有不同傾斜角度的切孔，使牛奶旋轉攪打以混合其質地。當達到最佳溫度時即自動停止時，牛奶便準備好了。

咖啡師得就每根蒸汽棒，選擇兩種不同的溫度和兩種不同的發泡率，以快速因應顧客的需求。

EASYCREAM SYSTEM. FROTHING MILK HAS NEVER BEEN EASIER.

Aurelia Wave is also available with the *Easycream* system, which allows the barista to obtain a dense, velvety milk cream quickly and automatically. An extremely flexible technology that allows the barista to set the temperature and the density of the milk. Just press the button and the *Easycream* wand begins its work: in a first phase, it balances steam and air injection, then interrupts the airflow and only emits vapor that, with tangential holes at different inclination on the wand terminal, gives milk a rotary movement blending its texture. When the optimal temperature is reached, it stops automatically. Milk is ready.

Aurelia Wave allows the barista to choose two different temperatures and two different densities on each wand to quickly respond to customer needs.
